

Calcined Neuburg Siliceous Earth, also known by its trade name

SILFIT

is one in nature originated inorganic compound of amorphous and crypto-crystalline silica and lamellar kaolinite which has been treated thermally.

As unique mineralogical entity calcined Neuburg Siliceous Earth got the individual CAS-No.1214268-39-9 with the CAS-Name 'Siliceous Earth, calcined'.

Its main components identified by
 CAS-Nr. 7631-86-9 for amorphous and crypto-crystalline Silica and
 CAS-Nr. 92704-41-1 for calcined kaolinite
 can be found in the following international registries:

Country	Registry Token	Registered?	Comment
Australia	AICS	Yes, under Nr.: 66402-68-4	
China	IECSC	Yes	
Europe	EINECS	Yes	
Japan	ENCS/ISHL	Yes	
Canada	DSL	Yes	
Korea	ECL	Yes	
New Zealand	NZIoC	Yes	
Philippines	PICCS	Yes	
Switzerland	Swiss ID No.	Yes, Silica under G-8311 Kaolinite is exempted.	
USA	TSCA	Yes
